

I think the Video Relay or Remote System should be put in each hospitals, to dial a free interpreter with the doctors at the hospitals. More than 99% of SC deaf or HOH or deaf/blind cannot get a qualified interpreter for emergency needs. FCC prohibits to use VRS with the doctor with a deaf in the same room. However I use the VRS with the Dept. of Mental Health and it works excellent communicate with my counselor from somewhere else and I at Myrtle Beach. Very critical is that we do not have enough qualified interpreter in Myrtle Beach, SC or Conway. All our qualified interpreters left. It is not right that we have to fight the doctors or hospitals for denying us qualified interpreter. I had been on the case with my doctor for denying me and fired me as his patient for more than 3 yrs. Jumping from one agency to another. The doctors or hospitals violate my civil rights, 504 Voc. Reh, U.S. Constitution and else. The doctors or hospitals dont want to pay for the interpreter's fee period. I had been struggled with this matter for a long time. Who is going to enforce the law, no one.
